HOW TO CALCULATE FARES

- ◇ Locate on the "Travel Codes" table the column/row of the departure and arrival stations
 (Example: Stresa - Isola Madre = code 5)
- ◇ Compare the travel code on the two tables here on the right, the one above regarding groups travels, the lower pertaining individual excursions. Each numbered row proposes the four price combinations: simple one way run, one way travel with intermediate stops, return journey without stops and free pass tickets
 (Ex.: Stresa - Isola Madre = code 5, groups, return journey without stops, Adults € 7,20...)

TRAVELS ON THE ITALIAN BASIN OF LAKE MAGGIORE

PASSENGERS FARE FOR ITALIAN BASIN TRAVELS

• One way travels

one way travels can be:

- a) **WITHOUT any intermediate stops** (price calculated on the *Ordinary Fare no 1*) and
 b) **WITH intermediate stops** (price calculated on the *Special One Way Fare no 2*).

Without Intermediate Stops ticket requires that the passengers reaches directly his arrival station.

Intermediate Stops tickets allows the traveller to arrive to destination even after one or more temporary halts accomplished according to the stations sequence determined on the *Official N.L.M. Timetable*.

• Return travels (and free pass travels)

To *return* or *Free Pass travels* correspond:

- c) **Double Run Fares WITHOUT intermediate stops** (double of prices worked out on *Ordinary Fare no 1*) or
 d) **“Free Pass” Fares** (“*Libera Circolazione*”) (determined on *Fare no 3*)

Free Pass Fare allows the passenger to travel freely on all *ordinary boats* (for hydrofoils or catamarans see note above) that perform the navigation service on the zone chosen by the client (he decides the two farthest stations that he wants to reach and travel between. These stations names will be reported on his ticket)

• Tickets validity

Tickets are valid **one** day.
